CONTENTS

Special Issue: ^{252}Cf-Plasma Desorption Mass Spectrometry — Proceedings of the 6th Texas Symposium on Mass Spectrometry, held in Gaspé, Que., Canada, 15–19 June, 1992

Foreword ... ix

Ion track structure probed by plasma desorption mass spectrometry
B.U.R. Sundqvist (Uppsala, Sweden) ... 1

The role played by fast electrons in heavy-ion-induced desorption and track formation
T.A. Tombrello (Pasadena, CA, USA) ... 11

Mechanisms for the desorption of large organic molecules. Part 2
R.E. Johnson (Charlottesville, VA, USA) ... 17

Approaches to plasma desorption mass spectrometry by some theoretical physics concepts
E.R. Hilf (Oldenburg, Germany) ... 25

Ionization of noble gas atoms by alpha particles and fission fragments from the decay of ^{252}Cf
B.M. Hill, R.L. Watson, K. Wohrer, B.B. Bandong, G. Sampoll and V. Horvat (College Station, TX, USA) ... 37

Secondary ion emission from various metals and the semiconductors Si and GaAs induced by mega-electronvolt ion impact
R. Matthäus, R. Moshammer, G.v. Hayn, K. Wien
(Darmstadt, Germany), S. Della-Negra and Y. Le Beyec (Orsay, France) ... 45

Time-of-flight mass spectrometry using mega-electronvolt neutral beams
J.M.F. Jeronymo, E.F. da Silveira, R.R. Pinho, C.V. Barros Leite,
G.B. Baptista and A.C.M. Gonçalves (Rio de Janeiro, Brazil) ... 59

Surface secondary electron and secondary ion emission induced by large molecular ion impacts
A. Brunelle, P. Chaurand, S. Della-Negra, Y. Le Beyec (Orsay, France) and G.B. Baptista (Rio de Janeiro, Brazil) ... 65

Detection of large molecular ions by secondary ion and secondary electron emission
A. Verentchikov, W. Ens, J. Martens and K.G. Standing (Winnipeg, Man., Canada) ... 75

Improving positive ion detection by reduction of the work function of post-acceleration dynodes
S.A. Ruatta, J. Perel, E.S. Parilis and J.F. Mahoney (Duart, CA, USA) ... 85

Comparison of collision-induced dissociation and surface-induced dissociation mass spectra of peptides obtained using a four-sector mass spectrometer
D. Despeyroux, A.D. Wright and K.R. Jennings (Coventry, UK) ... 95

Molecular fragmentation and formation processes in plasma desorption mass spectrometry
E.R. Hilf, W. Tuszynski, B. Curdes, J. Curdes (Oldenburg, Germany), M. Wagner and K. Wien (Darmstadt, Germany) ... 101

Cleavage of interchain disulfide bonds following matrix-assisted laser desorption
J. Zhou, W. Ens, N. Poppe-Schriemer, K.G. Standing and J.B. Westmore (Winnipeg, Man., Canada) ... 115

Derivatization to enhance sequence-specific fragmentation of peptides and proteins
D.M. Bunk and R.D. Macfarlane (College Station, TX, USA) ... 123

A strategy to assign a series of fragment ions: investigation of fragment ions involving peptide side chain and backbone cleavage
A. Grey Craig, S.C. Koerber, J.E. Rivier (San Diego, CA, USA) and H. Bennich (Uppsala, Sweden) ... 137

Applications of matrix-assisted techniques in plasma desorption mass spectrometry
W. Tuszynski (Oldenburg, Germany) ... 151

Quantitative matrix assisted plasma desorption mass spectrometry
H. Jungclas, L. Schmidt, P. Köhl and H.-W. Fritsch (Marburg, Germany) ... 157

Matrix effects in plasma desorption mass spectrometry
S. Bouchonnet, Y. Hoppilliard and C. Mauriac (Palaiseau, France) ... 163

^{252}Cf plasma desorption mass spectrometry in combination with protease treatment for localizing a non-linear zinc binding domain in human interleukin-3
P.A. van Veelen (Leiden, The Netherlands), V. Smit (Rijswijk, The Netherlands), U.R. Tjaden and J. van der Greef (Leiden, The Netherlands) ... 179

Analysis by ^{252}Cf plasma desorption mass spectrometry of *Bordetella pertussis* endotoxin after nitrous deamination
C. Deprun, D. Karibian and M. Caroff (Orsay, France) ... 187

Application of ^{252}Cf plasma desorption mass spectrometry in dental research
H.-W. Fritsch, L. Schmidt, P. Köhl, H. Jungclas (Marburg, Germany) and H. Duschner (Mainz, Germany) ... 191

Characterization of high nuclearity close-packed anion platinum carbonyl clusters by ^{252}Cf plasma desorption mass spectrometry
J.M. Hughes, Y. Huang, R.D. Macfarlane, C.J. McNeal (College Station, TX, USA), G.J. Lewis and L.F. Dahl (Madison, WI, USA) 197
Californium-252 plasma desorption mass spectrometry as a tool for studies of metallocenes
G. Allmaier and E.R. Schmid (Vienna, Austria). 211
